

New and Exciting Parent/Child Class!

We are introducing a **new class** for babies who are crawling but not yet walking. This is a 30-minute parent/child class called Itsy-Bitsy Spiders.

During this class, we will provide parents and their babies quality time while introducing gross and fine motor development, core strength, balance, and hand-eye coordination. Locomotor skills are introduced including rolling, eye tracking, and social skills with other children.

The activities used in these classes are a great foundation for your child's development.

Stop by or call the office for more details!
